Plants with Style (T)(C)

Gardeners need chic, sustainable, thriving plants for modern lifestyles. Why settle for lackluster gardens filled with dull, ho-hum plants? Plants after all are the very essence of fashionable gardening. In this spirited, provocative lecture, 20-something plantsman Kelly Norris calls for a garden revolution: out with boring plants and in with stylish alternatives that captivate and enthrall. A passionate horticulturist and lifelong gardener, Kelly is the ideal guide to the botanical riches available to today's gardeners. In chapters on environment, structure, seasonal standouts, and plant combinations he shines a spotlight on the A-list plants in every category—plants that will thrive, not merely survive. Along the way, he shows you how to forge a personal style in harmony with your garden's setting and local environment. As Kelly puts it, "A garden is the best way to savor life on earth." Let *Plants with Style* guide you to the plants that will provide a richer, more fulfilling connection between you and your own patch of soil.

Planting for the Future (T)

Modern landscapes have to be more than beautiful. Gardening with purpose is the new mantra for 21st century consumers. Gardens have to be aesthetically interesting, while serving multiple purposes—benefiting wildlife, feeding us, providing safe and peaceful spaces for public gatherings, mitigating stormwater and the list goes on. The plants of our future, the new products that will shape our industry, might surprise you. In this lecture especially tailored to landscape design professionals, plantsman Kelly Norris challenges audiences to plant more diversity in landscapes, while maximizing aesthetics and functionality in contemporary design. The synergies of retail, public and commercial horticulture collide for a beautiful, surprising and ecologically conscious look at the New American garden.

Planting for the Future (C)

Modern gardens must be more than beautiful--they must celebrate biodiversity and create tangible connections to our environment. Gardening with purpose is the new mantra as 21st century consumers seek to garden with greater purpose, creating gardens that benefit wildlife, feed us, enable greater public engagement, mitigate stormwater and more. The plants of our future and the recipes for using them might surprise you. In this lecture especially tailored to garden enthusiasts, plantsman Kelly Norris challenges audiences to plant more diverse gardens, while maximizing aesthetics and functionality through contemporary design. The synergies of people, plants and passion collide for a beautiful, surprising and ecologically conscious look at the New American garden.

New Perennials for Modern Gardens (T)(C)

With all the interest in the New Perennial Movement and a market shift towards sustainable gardening, a new palette of plants has emerged at the intersection of form and function. Perennials used in this style of gardening thrive in social arrangements, translating their native ecologies into beautiful communities of plants that ultimately require less resources and incorporate more diversity into the modern landscape. While many old favorites continue to have a place in these contemporary designs, many underappreciated perennials, particularly natives, have a new context in which to be appreciated. Plantsman Kelly Norris will highlight several examples of sustainable, plant-driven gardens from across the country, comparing and contrasting them to the wild circumstances that inspired them, while introducing the audience to the perennials within them.

HortEcology: Lessons from Wild Plant Communities (T)

Kelly's love for native plants and his experiences with wild plant communities have shaped his career in profound ways. As a so-called hort-ecologist, Kelly strives to interpret native ecosystems into beautiful, functional landscapes in the urban context. Too often, professional horticulturists appropriate plants as if they were inanimate objects, instead of truly understanding how plants interact and function within the landscape environment. Join Kelly in an exploration of wild plant communities and their constituents from across North America that will inspire and inform your professional practice whether as a grower, retailer or designer.

HortEcology: Lessons from Wild Plant Communities (C)

Kelly's love for native plants and his experiences with wild plant communities have shaped his career in profound ways. As a so-called hort-ecologist, he strives to interpret native ecosystems into beautiful, functional garden spaces that foster romantic, emotional connections between humans and the land. Kelly maintains an unwavering commitment to introduce and promote a sustainable plant palette, work that takes him across the North American continent in search of great plants for great gardens. Beyond the plants themselves, understanding their functional roles in wild environments can lead to profound insights in how to adapt them to

gardens. Take up the explorer's hat in this travelogue that fuses horticulture and ecology into ideas and practices you can plant at home.

Planting on the Wild Side: Inspirations, Ideas and Recipes (C)

New Naturalism is all the range in modern horticulture and for good reason: gardens inspired by natural systems promote authentic connections between land, environment and humanity. In this era of purposeful and thoughtful gardening, planting is a powerful verb. Gardeners can celebrate the experience of bringing nature closer to home through expressions of wildness and intentional consideration of how plants grow over time. In this lecture brimming with examples from public and private spaces around the world, plantsman Kelly Norris strives to inspire audiences with practical and inspiring ideas for planting the world a more beautiful, functional place.

Cultivating the Rainbow (C)

Join author and iris expert Kelly Norris for a tour through the magical world of bearded irises. In his comprehensive and definitive *A Guide to Bearded Irises* (Timber Press 2012), Kelly provides an accessible yet authoritative overview of these deservedly popular plants. In this lecture, he'll show you how to grow bearded irises successfully, how to use them in the garden, how to choose the best plants, and how to "create" new irises. His lecture, like his book, provides portraits of outstanding cultivars in each of the six recognized categories, including a tour of the latest releases, color breaks and hybridizing achievements. You'll be guaranteed to have an educated opinion about bearded irises when you're finished.
